

Sustainability and Circular Design

Sustainability and Circular Design are topics that are part of our daily life at Fenabel.

Through a continuous search, we've been able to provide more sustainable products to our customers, thus building a better future for us all. That has been one of our main focusses and we are very excited that a growing number of other companies are showing the same concern.

Come join us!

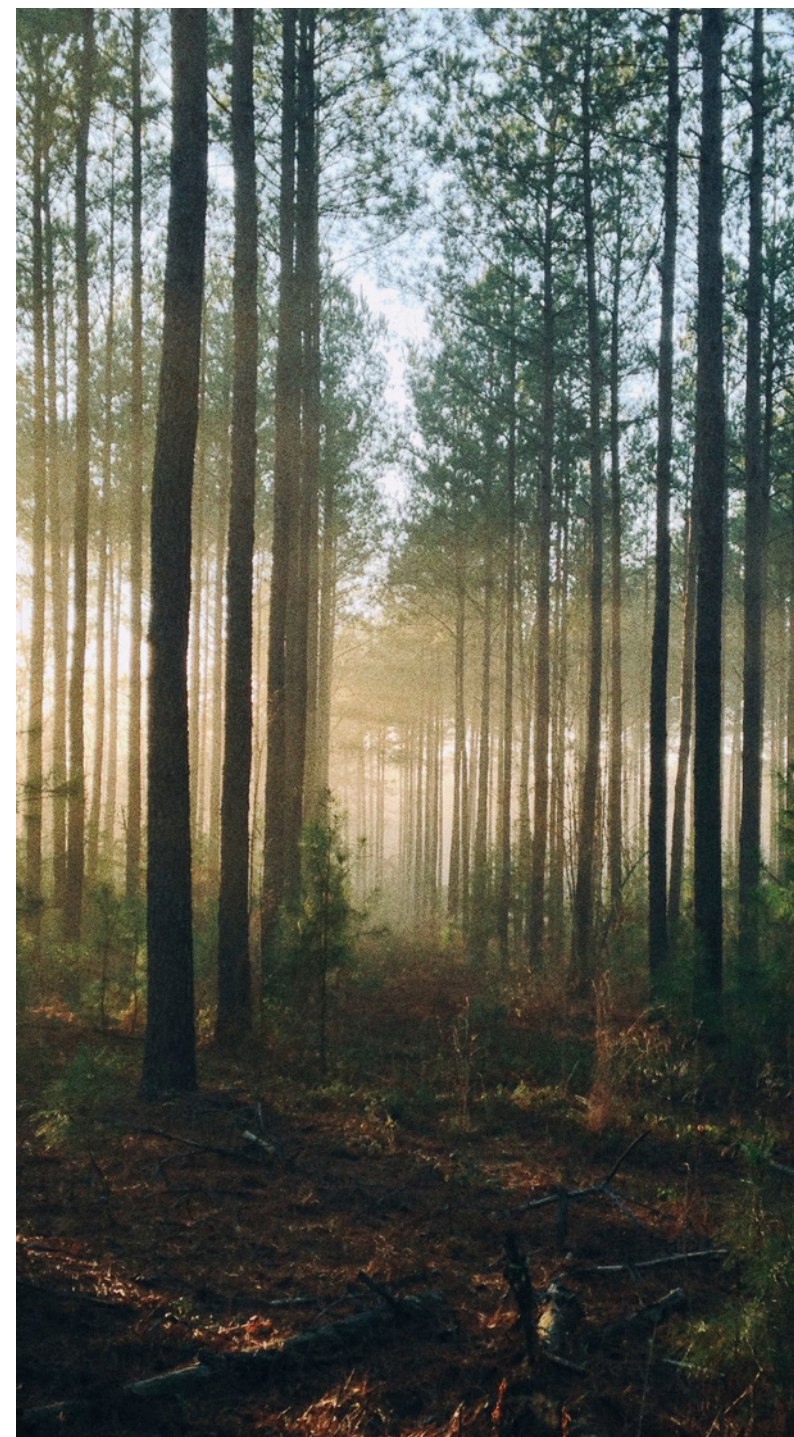

Quality and Environmental Policy

At Fenabel there is a strict quality control in everything we do. We are positive that only by guaranteeing the quality of our products will we be able to assert ourselves in the market.

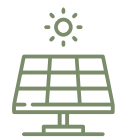

To do this, we have been continually implementing the following policies:

- Always act in our clients' best interests.
- Identify the real needs of our customers;
- Develop value added products for our customers, providing a greater differentiation;
- Be effective in monetizing the production costs in order to be more competitive;
- Fully comply with the quality patterns that we have set
- Systematically improve the processes of production as well as biodiversity preservation.
- Establish revising objectives and goals, considering the environmental impacts in order to ensure a sustainable development and a continuous improvement;
- Protect the Environment by preventing pollution and preserving the biodiversity;
- Reduce our ecological footprint, by decreasing the consumption of water, electricity, fuels, raw materials and chemical products through a more rational use of them;
- Reducing the production of waste by reusing, selecting and recycling it, and thus giving it more sustainable destinations.
- Raise awareness and train employees, suppliers and our business associates for the best environmental good practices.

Fenabel for a better future

Fenabel aims to provide products that are of high quality, safe and with less environmental impact. We have implemented several measures in the production and supply chain considering the environment improvement, through greater efficiency of the resources, energy and material recyclability.

Part of our energy is obtained from solar panels, installed on the rooftop of our facilities, from which Fenabel achieves the following environmental benefits:

261.17
tons of standard
coal saving

310.14
tons of CO2
avoided

424
equivalent
trees planted

The emissions resulting from the production process are treated, retained and filtered before being returned to the atmosphere.

The boxes we use for packaging and shipping our products are recyclable.

Zero waste of wood.
All wood is reused for a second and third purpose/ life, such as being used for components and heating from which the ashes may be used in organic farming.

Because we believe that sustainability is a relevant issue, Fenabel offers you a variety of sustainable and recycled fabrics, so you can keep your interior design project not only stylish but also environmentally friendly.

CIRCO

Hub Portugal | CRIAR NEGÓCIOS ATRAVÉS DO DESIGN CIRCULAR

The sustainability theme is not just a certificate or a guidebook to be followed. It is an intrinsic process of the production planning as well as the product.

Along with the great applications and adjustments made throughout both the creative and production process, sustainability must be extended to a long-term Circular Economy plan.

For that purpose, Fenabel has participated in an Empowerment and Transformation Programme, in a partnership with LNEG- the Portuguese National Laboratory of Energy and Geology, IAPMEI - the main governmental agency for economic policies targeted to Portuguese companies and APA- Portuguese Agency of the Environment, called CIRCO HUB Portugal.

Subsequently, Fenabel outlined a 5 to 10 year circular plan implementation aiming at the potentiation of the product and a second life possibility, increasing the value chain and raising the customer's awareness.

Social Responsibility

Fenabel's practice of social responsibility aims to maximise the positive impacts of its activity, not only to promote the well-being of its employees, but also to contribute to the prosperity of the community where it operates.

We've participated in several social responsibility projects, such as:

- "A factory for East Timor" – with the donation of machinery
- Charities such as "Mão Solidária" e "Associação Remar" – with the donation of Fenabel's products
- EPIS – Portuguese private businessmen association for social inclusion – as a founding-partner
- Portuguese League Against Cancer- donating products for charity auctions

Fenabel also offers support to institutions such as:

- IPO (Portuguese Oncology Institute)
- José Saramago Foundation (Casa dos Bicos)
- Baltar's Social Centre
- Rebordosa's fire brigade
- At the invitation of the Portuguese government, Fenabel participated in two editions of Duets, an international event promoting design and contemporary creativity, and contribute to the United Nations.
- Fenabel created the OASIS chair in partnership with the designer Paollo Rizzatto and the inspiration for this model was the famous Brazilian singer Maria Bethânia. Only five chairs were manufactured. These chairs were auctioned by Christie's. The resulting fund was donated to support educational projects and humanitarian missions in Africa. The following year, Fenabel a chair inspired by the Football Player Maradona and designed by the Portuguese designer Pedro Sottomayor.

We believe that helping others should be part of the DNA of all successful companies.

Certifications

EMPRESA CERTIFICADA

UNE EN-ISO 9001:2015

With a focus on offering our customers the best products and services, and anticipating industry trends, Fenabel has been certified for the activities of "Design, manufacture, marketing and distribution of furniture", by the EIC organization, with regard to ISO 9001.

EMPRESA CERTIFICADA

UNE EN-ISO 14001:2015

At Fenabel, we think that environmental issues affect us all and should be overcome from a global perspective. We therefore decided to introduce and work with the Environmental Management System, being one of the few companies in the furniture sector, in our region, to obtain the ISO-UNE-EN14001:2015 certification.

Fenabel already processes all the necessary documentation (Integrated Quality and Environment Policy, Environmental Procedures Manual, amongst others) and works according to ISO 14001. We seek to convey this concern for the environment to all our customers and suppliers.

PEFC/13-31-146

In order to guarantee to our customers that the wood we use originates from sustainably managed forests. The Chain of Custody certification offers assurances that the final wood product can be traced back to a sustainable source and that production processes used to transform the finished product have been implemented with due respect for environmental, economic, and social standards.
